

MIATAS AT MAZDA RACEWAY

TECHNICAL INSPECTION FORM

Name _____ Inspection Date _____

Signature _____

Vehicle Year _____ Color _____ Car # _____

The purpose of this document is to act as a summary verification that the aforementioned vehicle is in good operating condition and capable of safe operation at high speeds on a closed road course. It is also understood that it is the sole responsibility of the participant to insure that his or her vehicle has met these requirements and has been properly inspected. The organizers reserve the right to confirm that any vehicle meets the required standards. This form is a summary of the more detailed inspection guidelines which can be found on Miatasat-MazdaRaceway.com.

Please note that all vehicles must be equipped with 6-point roll bars or cages. The factory bars in the NC and ND are acceptable for run group E only. 'Style Bars' do not meet these requirements and are not allowed other than on parade laps.

Check or 'X' the boxes below that you have inspected. Circle the boxes you have not inspected or those that may meet the minimum standards.

Vehicle Body – all panels and latches attached and operational.

Suspension, steering, tires and wheels inspected.

Braking system inspected for wear and safe operation.

Axles and CV joints – in good repair and properly fastened.

Fuel system – functional and without leaks.

Electrical system – battery secured and no loose or exposed wires.

Exhaust system – functional and securely fastened.

Cooling system – system full and free of leaks.

Top of occupants' helmets fall below a line drawn from the top of the roll bar to the top of the windshield frame.

Belts, hoses & filters in good repair.

Misc. fluids – inspected and filled to recommended levels.

Seats and seat belts - proper type and securely fastened.

Steering wheel securely mounted.

Mirrors securely mounted.

'in-car' devices properly mounted. (no hand held cameras allowed in vehicles)

Loose items removed from vehicle trunk and passenger compartments.

Convertible top and windows down OR

power hard top raised and windows down

Engine and engine bay inspected for fluids, leaks, and to ensure that all fasteners are tight.

Helmet(s) not damaged and of required safety/agency rating.
